Architects, general contractors, REITS, and homeowners have trusted in Pli-Dek's ability to provide durable, effective, and affordable traffic coating systems.

PLI-DEK™ ICC-ES ESR-2097 System

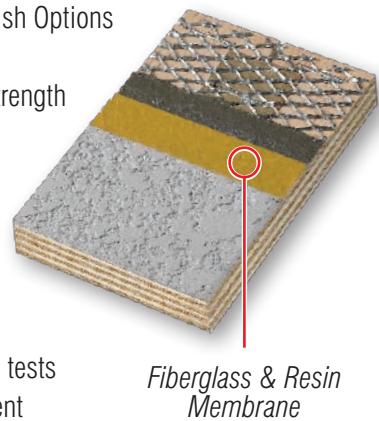

Waterproof Deck Coating – Plywood Substrates

The Pli-Dek System has been recognized by the International Code Council (ICC) since 1980 and has provided unsurpassed durability and waterproofing performance for a multitude of projects. The system's inherent durability, provided by a metal lath reinforced polymer-cement, offers early protection in the framing stage and throughout the construction process. Combining years of proven performance and extensive ASTM Testing, the Pli-Dek System proves to be the solution for the projects that demand a durable and effective pedestrian traffic-bearing waterproof deck coating.

System Highlights:

- ICC Evaluated since 1980
- One-Hour Fire Rated
- Class "A" Fire Rated
- Unlimited ICC Recognized Finish Options
- Approximately 1/4" thick
- Over 6000 psi Compressive Strength
- Seamless
- UV Stable
- Fast Drying
- Ability to create slope
- City of LA Approval
- Low Maintenance
- Successfully passed 20 ASTM tests
- Durable metal lath reinforcement

Fiberglass & Resin Membrane

PD™ Texture Coat

Decorative Concrete Overlay

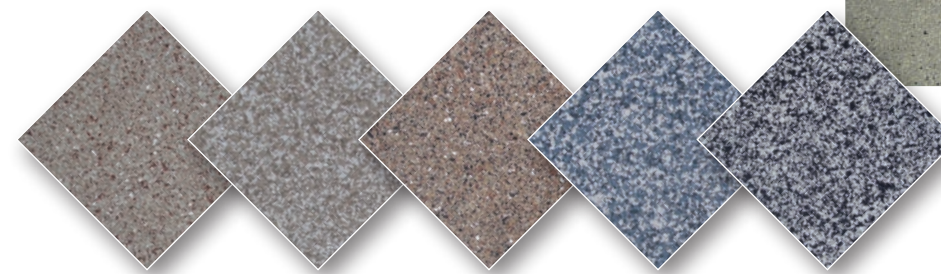

The PD Texture Coat is a decorative concrete overlay system designed for new or existing concrete surfaces that do not require waterproofing. The PD Texture Coat system is ideal for pool decks, patios, sidewalks, driveways, interior show rooms, and more. With multiple standard colors and the ability to achieve custom colors and textures, the PD Texture Coat will enhance the look and value of dull, existing concrete at an affordable price.

PD™ Epoxy Floor Systems

Industrial Floor Coating

The PD Epoxy Flooring System is designed to provide interior concrete substrates with a coating which offers unsurpassed durability, chemical resistance, maintainability, and the performance of a sealed surface. The system offers many finish options such as solid color applications, multi-colored "Granite Look" finishes, troweled/broadcast aggregate systems, as well as optional skid-resistant additives, and UV resistant top coats.

Desert Sand Sahara Mocha Blue Gray Black & White

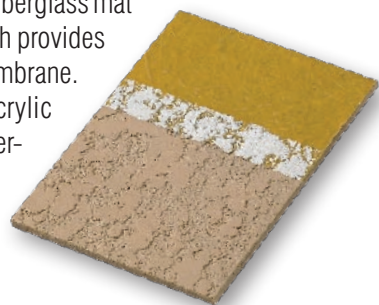

See color chart for Solid Colors.

PD™ Epoxy Floor Systems are ideal for airplane hangars, warehouse floors, showrooms, restaurants and garage floors.

Con-Dek™ Waterproofing System

Waterproof Deck Coating – Concrete Substrates

The Con-Dek System utilizes a 3/4 oz. fiberglass mat and an elastomeric acrylic resin, which provides a flexible, waterproof base coat membrane. With the combination of the finest acrylic resins and the durability of the polymer-modified cement finishes, the Con-Dek System provides a durable, yet flexible, waterproof system for years to come.

Optional Finishes

Pli-Dek has the ability to meet the needs of most architects and designers with a wide variety of finish options. Pli-Dek can achieve the look of tile, brick, stone, and other pattern finishes. If a pattern is not desired, a hand-textured stained finish is a perfect option with a wide array of colors and textures to choose from.

All finish options are compatible with the Pli-Dek ICC System, Con-Dek System, and PD Texture Coat System. See ICC-ES ESR-2097 for allowable values and/or condition of use concerning material presented in this document.
